

## BRINGING PREDICTABILITY WITH THE POWER OF THE CLOUD

### ROUTE BASED MONITORING

#### MACHINE SENTRY MOBILE (MSM-1)

- Portable sensor and wireless tablet
- Offline data collection, cloud sync
- 3-axis vibration, temperature
- 3 to 5 times faster data acquisition compared to traditional systems

Start making confident maintenance and optimization decisions with reliable data and the support of Westpower's vibration analysts and rotating equipment experts. Getting started is simple - no required infrastructure, no large upfront costs, and included set-up of cloud based monitoring.

AVT Reliability® is Westpower's partner for its Machine Sentry cloud-based condition monitoring products, which includes ADA™, the Automated Diagnostic Assistant.

### FIXED MONITORING

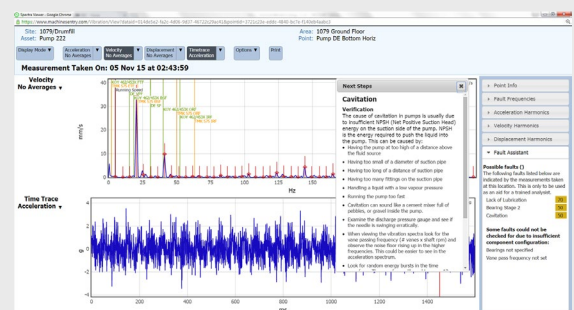

#### MACHINE SENTRY FIXED (MSF-1)

- Fixed wireless sensor
- Tablet sync, cloud sync, or wireless gateway automatic sync
- 3-axis vibration, temperature
- Up to 5 year battery life

### MACHINE SENTRY BRINGS IT ALL TOGETHER

Machine Sentry is a unique asset reliability management solution which integrates and organizes data from all of our products and all condition monitoring techniques, enabling effective maintenance planning and management reporting.

### ONLINE ADVANCED MONITORING

#### MACHINE SENTRY ONLINE (MSO-1)

- Continuous cloud monitoring for your most critical assets
- Multi-channel, multi-sensor
- Advanced vibration analysis
- Ethernet, WiFi, or GPRS connection
